

CSE 394- Spring 2016  
In-Class: Lab 4  
20 Points (Due: Tuesday 23<sup>rd</sup> 11:59 pm)

---

**Objectives:** Further enhance the knowledge about using Core Data

**Lab:** During this lab, we will develop a simple app that stores location visited (name) and a description in a Core Data entity. Users should be able to add and view record as shown in the screenshot given below. (Carefully study the core data example posted in the class website under lecture notes before you attempt this lab)

Point Allocation:

Correct Core Data Entity: 5 Pts

Add records functionality: 5 Pts

View Records (including next and previous buttons): 10 pts

**Submission Instructions**

Submit online to the blackboard using the link given under Lab 4
